Innovative Solutions in View

inUnum is an innovative technology company based in the Principality of Liechtenstein. Tasks that inspire us, passion in what we do, motivation, and teamwork are the prerequisites for our solutions and our success for many years.

For the establishment of our Scan Center in Eastern Switzerland / Rhine Valley, we are looking for a candidate at the Ruggell (FL) location.

IT System Engineer – SRE / DevOps (all genders)

Within our team, it is your task to design and expand our infrastructure architecture. inUworld started as a platform with a modular hybrid cloud approach. Based on modern technologies such as Kubernetes, Ansible, and other open-source components, we prioritize scalability, efficiency, and security. If these approaches interest you, you are in the right place with us.

We look forward to having you become a part of our team.

Your qualifications include:

- Education or professional experience in the field of computer science / IT
- Experience with Linux and container technologies
- Proficiency in scripting (Ansible, Python, or similar)
- Focus on open source
- Analytical thinking, excellent system understanding, and strong ability to learn
- Teamwork and ability to work independently
- English language proficiency in both written and spoken forms

We offer you:

- Extraordinary tasks in unconventional work areas
- The opportunity to learn new things and grow with the tasks
- A straightforward work environment where human values are important
- State-of-the-art equipment and ergonomic workstations
- 40-hour workweek (100%), 5 weeks of vacation, flexible working hours

Are you interested in this challenge and want to join our team? Then send us your application documents via email to info@inunum.com
