Innovative Solutions in View

inUnum is an innovative technology company based in the Principality of Liechtenstein. Tasks that inspire us, passion in what we do, motivation, and teamwork are the prerequisites for our solutions and our success for many years.

For the establishment of our Scan Center in Eastern Switzerland / Rhine Valley, we are looking for a candidate at the Ruggell (FL) location.

Web Frontend Developer (all genders)

You will become part of a team that is developing a new platform for BIM data interaction, collaboration, and processing. The platform enables interaction with 3D scans, models, and any other relevant data. The Front-End application is based on a modern cloud-based infrastructure and open-source technologies such as TypeScript and React. For this case, we are seeking support in the field of front-end development.

We look forward to having you become a part of our team.

The special features:

- Excellent development opportunities in a company with StartUp character
- Laser scanning, drone surveying, and data processing
- Close collaboration with the product development team

Your qualifications include:

- University or college degree in computer science or similar
- Several years of experience in web development (e.g., TypeScript, React)
- Experience in software architecture in the web domain
- Analytical thinking, excellent system understanding, and pronounced ability to learn
- Teamwork and ability to work independently
- Proficiency in English, both written and spoken

We offer you:

- Extraordinary tasks in unconventional work areas
- The opportunity to learn new things and grow with the tasks
- A straightforward work environment where human values are important
- State-of-the-art equipment and ergonomic workstations
- 40-hour workweek (100%), 5 weeks of vacation, flexible working hours, work from home

Are you interested in this challenge and want to join our team? Then send us your application documents via email to info@inunum.com
