Innovative Solutions in View

inUnum is an innovative technology company based in the Principality of Liechtenstein. Tasks that inspire us, passion in what we do, motivation, and teamwork are the prerequisites for our solutions and our success for many years.

For the establishment of our Scan Center in Eastern Switzerland / Rhine Valley, we are looking for a candidate at the Ruggell (FL) location.

C++ Software Developer (all genders)

You conceptualize and develop solutions in the field of 3D Real-Time Scanning, Reality Capture, SLAM, and for our Construction Data Management Platform. Are you interested in topics such as platform portability, RESTful APIs, Distributed Systems, and PointCloud Processing? With us, you can contribute your knowledge, develop new ideas and approaches, and bring them to life.

We look forward to having you become a part of our team.

Your qualifications include:

- Completed technical studies (university, university of applied sciences) in the field of computer science, physics, mathematics, or a comparable education
- Experience with object-oriented software development techniques
- Several years of practical experience with Modern C++
- Open to developments in other object-oriented languages (e.g., TypeScript)
- Analytical thinking, excellent system understanding, and pronounced ability to learn
- Team spirit and independent work
- Proficiency in English, both spoken and written

We offer you:

- Extraordinary tasks in unconventional work areas
- The opportunity to learn new things and grow with the tasks
- A straightforward work environment where human values are important
- State-of-the-art equipment and ergonomic workstations
- 40-hour workweek (100%), 5 weeks of vacation, flexible working hours

Are you interested in this challenge and want to join our team? Then send us your application documents via email to info@inunum.com
